The window display

A finished shape comes out of its dashed frame and goes to the window: tape the shapes along the glass, one row a week, until the tree on the sheet matches the one in the corner.

Ages 4-6 do the taping and the choosing themselves; a two-year-old hands each shape up, one at a time.

Adult: the tape and the window ledge stay in adult hands, and an adult stays in the room while the crayon box is out — close enough to act.
