Cursive Letter Tracing

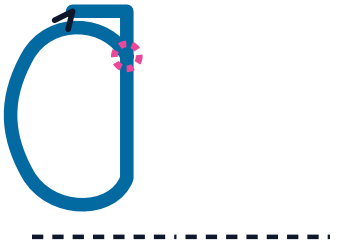

Six lowercase entry strokes, each as a bold hollow outline with a pink start dot and a direction arrow: a, c, d, g, o, s. The routine: **trace the outline, then two dashed passes underneath — one stroke a day.**

A · THE ROUND OPENER

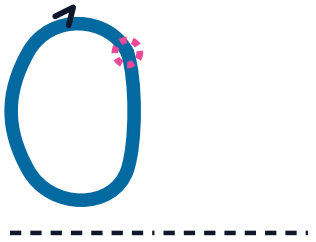

C · OPEN CURVE

D · TALL STEM, ROUND BODY

G · THE DESCENDER

O · THE SHAPE CLOSED

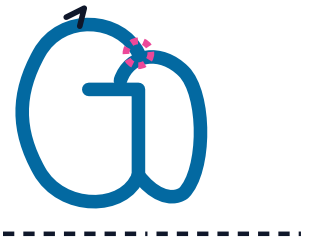

S · THE LEAN-OVER

Adult: a sharpened pencil, not a crayon — cursive joins live in thin lines. Rest the page flat on the table and keep an adult, close enough to act, in the room while the pencils are out.

Cursive Letter Tracing

Joins + name line · Ages 6-9

Two joined pairs, each drawn once already joined so the lift between letters is visible, plus a blank ruled line for the child's own name. **Trace the pair, then write it twice on the line.**

A-O · LIFT AT THE TOP

O-S · LIFT AT THE WAIST

The name line is the finish line

- [ ] Write the first letter once in faint pencil at the far left
- [ ] The child signs the name twice on the line
- [ ] One copy today, one copy next week — the second goes on the fridge

WRITE YOUR NAME IN CURSIVE ON THE LINE

Adult: one stroke a day, in order; the page goes on the stack finished or not. Stay in the room while the pencils are out — an adult, close enough to act.
