Forest Coloring Pages

Woodland · Ages 2-6

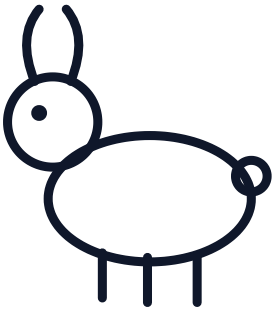

Thick outlines, one subject per page, plenty of white space inside the lines. Pick two crayons first, color the biggest shape first, then add one detail — **spots on the mushroom cap, or a sun in the corner.**

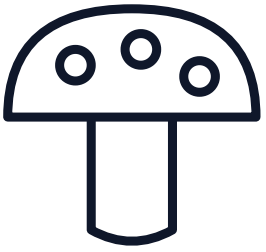

Fox

Owl

Deer

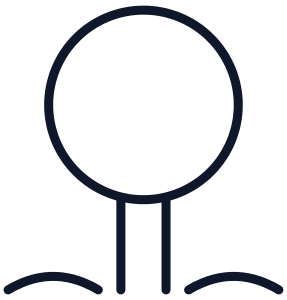

Mushroom

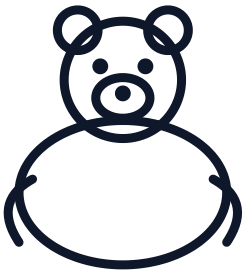

Ages 2-3: color the biggest shape only, then stop. Ages 4-6: add the detail — spots, eyes, one sun in the corner. An adult stays in the room while the crayon box is out and tapes the page corners down.

Forest Coloring Pages

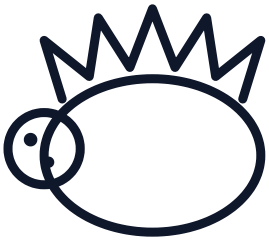

Same three moves on every page: two crayons first, biggest shape first, one detail last. Finished pages stack in a folder your child can flip through — **a finished forest, one sheet at a time.**

Tree

Bear

Hedgehog

Butterfly

Give the fox a name and the owl a job while the crayons are out — the next page starts with a character your child invented. Broken, short crayons give small hands more control than long new ones.
