Forest Coloring Pages

Woodland · Ages 2-6

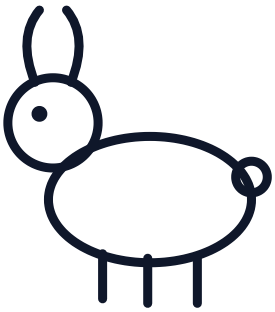

Thick outlines, one subject per page, plenty of white space inside the lines. Pick two crayons first, color the biggest shape first, then add one detail — **spots on the mushroom cap, or a sun in the corner.**

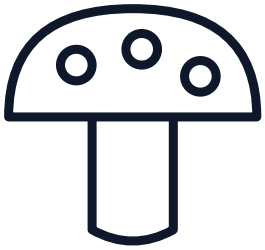

Fox

Owl

Deer

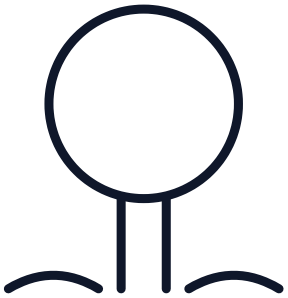

Mushroom

Ages 2-3: color the biggest shape only, then stop. Ages 4-6: add the detail — spots, eyes, one sun in the corner. An adult stays in the room while the crayon box is out and tapes the page corners down.

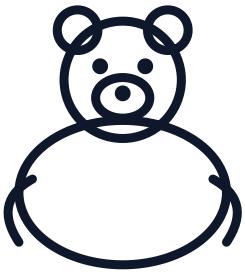

Forest Coloring Pages

Woodland · Ages 2-6

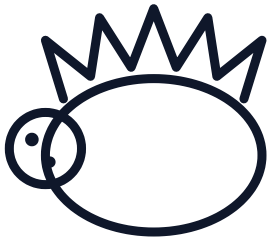

Same three moves on every page: two crayons first, biggest shape first, one detail last. Finished pages stack in a folder your child can flip through — **a finished forest, one sheet at a time.**

Tree

Bear

Hedgehog

Butterfly

> Give the fox a name and the owl a job while the crayons are out — the next page starts with a character your child invented. Broken, short crayons give small hands more control than long new ones.
